

Natural Gas Design Lead (Utility)

Experience

- Experience in pipeline construction and civil engineering design
- Experience with Autodesk Civil 3D and ESRI GIS

Salary

- Negotiable and commensurate with applicable experience

Responsibilities

The ability to work within a project team as well as direct the work of others is necessary. Successful applicant must be able to demonstrate experience and/or skills in the following areas:

- Design and Manage Natural Gas Distribution Projects
- Research “legacy” documents (as-builts, record documents, etc.)
- Coordinate projects with Utility client, Operations, and Contractor
- Reconnaissance of existing conditions, identifying potential obstacles/conflicts
- Support the development, preparation, and submission of design drawings. Secure permits, right-of-way and other regulatory approvals necessary for construction
- Create Construction Cost Estimates
- Assist in analyzing and organizing pipeline data and records
- Experience in pipeline construction and civil engineering design
- Experience with Autodesk Civil 3D and ESRI GIS
- Experience with Subsurface utility design and construction (a plus)
- Experience with Design of pipeline facilities (mains, service, valve sites, etc.)
- Ability to work on multiple projects concurrently while maintaining strong attention to detail with limited supervision
- Ability to work within a team to coordinate assignments
- Proficiency with Microsoft Office (word, excel, project, etc.)
