

Architectural Designer

Experience

- Minimum 5+ Years Architectural Drafting/Design Experience
- Minimum 1 Year Revit Experience (preferred)

Salary

- Negotiable and commensurate with applicable work experience

Responsibilities

The applicant should be self-motivated with an attention to detail. The successful applicant must be able to work with an architect to create, develop, and prepare construction documents.

Successful applicant must be able to demonstrate experience and/or skills in the following areas:

- Ability to use AutoCAD to prepare detailed design drawings with plans, sections, details, elevations and specifications as designated by the design team.
- Must be able to produce detailed and accurate construction drawings.
- Strong understanding of architectural design principles, building materials and construction methods.
- Ability to go on-site and perform field documentation of existing conditions.
- Ability to work on multiple projects and tasks while maintaining efficiency and quality of work.
- Knowledge of drafting standards with ability to produce clean, clear, and concise design drawings in accordance with each client's standards.
- Must be able to work well in a team environment including other engineering departments.
- Problem solving and critical-thinking skills when designing/developing engineered drawings.
- Takes pride in work and takes initiative to expand knowledge base.
- Proficient use of MS Outlook, AutoCAD, Revit, MS Word, and Excel.
- 3D rendering experience preferred.
